Important Notes:

- Stay on schedule and do not procrastinate. Work on Homework Assignments throughout the week. They are long due to the compressed summer schedule. Do not wait until the last minute to complete them. Doing so will jeopardize your success in this class.
- Online assignments and tests must be completed by 11:59 p.m. on the due date indicated for each online test or assignment.
- Information on the Final Exams will be posted a week prior to the exam. You may be required to come to campus (or a proctored test site) to take the exam. I have been known to give the Final Exam online, but you should anticipate taking it onsite or at a proctored location. This means learn the formulas!!
- Students may withdraw with a *W* up to or on October 6th. A *W* or a *Y* will be assigned to a withdraw request after October 6th. ***Important: See the withdraw policy in the syllabus.***
